BM STC (Italian Books) 34; Adams A 1310; Zeuthen, Die Lehre von den Kegelschnitten im Altertum (Kopenhagen 1886/1902). This is the first important edition of the first four books of Apollonius of Perge's "Conica". Books five to seven remained unknown up to 1710 when Edmund Halley received a manuscript in Arabian from the collection of Johan Golius. He then published a latin translation of books five to seven, an outlook on the lost book eight, and a greek version of books one to four. Apollonius of Perge's "Conica" remains together with Euclid's "Geometry" the most important mathematical treatise of ancient Greece. Descartes and Newton used it for their studies and further developments. Our copy is complete and very well preserved but in a later binding. This is also Vincenzo Scamozzi's copy with his own entry in MS on the title-page: "De ex libris Vincentij Scamotij". Another MS entry on leaf 25r "Hyperbola - Ellipsi - Circuli" might also be from Scamozzi. Books from the library of Vincenzo Scamozzi are rare and can hardly be found in the trade.

Brunschwig, Incunables et seizieme siecle, Auktion bei rauch, Genf, 1933) No. 294. First illustrated edition of the collected works, intended by the corrector of the printer, Jodocus Badius Ascenius. The text follows the Parisien edition of 1492, and the commentaries are from Aelius Donatus and Guy Juvénal, which are accompagnied by a commentary from the editor Ascenius. The book contains 161 woodcuts (8 repeated) and is without any doubt the highlight of Lyonese book-illustration of the 15th century. It has become rare, much rarer as the Grüninger edition of 1496, and we could trace only one copy during the past 20 years (the Otto-Schäfer copy at Christie's New York, 1995). Another - incomplete - copy was sold at auction in 1933 in Geneve (the Silvain S. Brunschwig copy). Our copy misses the last blank leaf, otherwise it is a complete and finely preserved copy bound in the early 17th century in Italian full-vellum with title on spine. No staines or browning throughout, upper white margins sometimes shortcut but all in all a fine copy of this scarce book.
